

HARISH.K

Aspiring and motivated Game Developer with hands-on experience in Unity Engine and C# programming. Skilled in developing mini-game prototypes with a strong understanding of core gameplay mechanics, user interaction, and interactive design. Passionate about creating engaging gaming experiences and continuously improving technical and creative skills.

Work Experience

Junior Game Developer

Foxziod Game Studios

- Worked on game development tasks using Unity Engine.
- Contributed to implementing gameplay features and improving game functionality.
- Collaborated with the team to develop and refine game prototypes.

Game Developer Intern

Foxziod Game Studios

- Gained hands-on experience in using Unity Game Engine for game development.
- Learned and implemented character movement using C# scripting.
- Developed a maze puzzle game prototype as part of the internship project.
- Built a strong foundation in core game development concepts and mechanics.

Projects

2D Maze Puzzle Game (Prototype)

- Developed a 2D maze game using Unity with player movement and collision system.
- Focused on core gameplay mechanics and level design.

2D Level-Based Runner Game (Prototype)

- Created a 2D runner game with character movement and level progression.
- Implemented multiple levels with smooth controls and gameplay.

Educational Background

B.Tech-Computer Science Engineering (AI & ML)

Periyar Maniammai Institute of science and technology
Expected Graduation:2027

Skills

Technical Skills

- Unity Game Engine
- C# Programming
- Game Mechanics Development
- UI Implementation (Unity UI)
- Physics Handling (Unity Physics)
- Debugging & Problem Solving

Game Development Skills

- Player Movement Implementation
- Level Design (Basic)
- Game Testing & Debugging
- Prototype Development

Languages

- English (mid)
- Tamil (Fluent)

Certification

- Certification in Python Programming
- Certification in C / C++ Programming
- Diploma in Computer Applications (DCA)
